Education

Faculty of Computer Science and Engineering (FCSE-UKIM)
Department: Software Engineering and Information Systems

Skopje, North Macedonia
2022 - Present

Ljupčo Santov High School

Kochani, North Macedonia
2018 - 2022

University Projects

Medical Examination Booking Application

Sep 2025

- **Description:** A web application that allows doctors to add available appointment slots (terms) and patients to schedule their appointments with doctors. Patients can also view available doctors, manage their bookings, and make online payments.
- **Role:** Developed both backend and frontend features.
- **Technologies Used:** Spring Boot, Spring Security, Docker Compose, PostgreSQL, React, Keycloak, Stripe.
- **Outcome:** Built a full-stack web application, gaining practical experience integrating authentication with Keycloak and connecting frontend with backend services.

Travel Agency Management Application

Jan 2026

- **Description:** A web application that allows users to browse and book travel packages. Users can view package details, check country information via an external API, add packages to a wishlist, apply discount codes, and make online payments via Stripe.
- **Role:** Developed both backend and frontend features (frontend implemented using Razor Views .cshtml).
- **Technologies Used:** ASP.NET Core MVC, Razor Views (.cshtml), PostgreSQL, Entity Framework Core, Stripe, REST API, Microsoft Azure.
- **Outcome:** Gained experience in full-stack development, integrating external APIs, database management, and online payment functionality.

Additional

Language Skills: Macedonian, English

Technical Skills: Java, C#, Python, PHP, JavaScript, React, Spring Boot, Django, Laravel, .NET, PostgreSQL, Keycloak, GitHub

Interests/Hobbies: Building personal coding projects, exploring web development and software tools, solving coding challenges.
